Art & Music Cafe

Mrs.T

Art

In art class this month we continued exploring the colour green as well as what happens when two colours are mixed together. We used food colouring to explore primary and secondary colours. Students were asked to explore colours to determine which two colours to use to make orange/pumpkin playdough. Students decorated either ghosts or pumpkins using all loose materials of different textures and colours with textured paint.

October

OCTOBER is always an exciting month to explore the changes in nature as well as the beautiful colours around us. We took advantage of the nice weather on some SOUND walks as well as COLOUR walks where students were encouraged to listen to nature sounds and find a variety of colours in their surroundings. We also participated in our “Annual Turkey Races” which are always so much fun and everyone seemed to enjoy.

Music

This month the focus has been on LOUD vs QUIET as well as learning action songs. Some classes started learning about body percussion and beat.. This lesson will continue into November. Students loved exploring their own finger puppets and choosing which was the loud puppet and which was the quiet puppet. Mrs.T of course brought back some familiar puppets from years past to help read the story Mortimer by Robert Munsch.
