

JUNE

VIRTUAL FIELD TRIP

Students participated in creating a school time capsule filled with beautiful memories of challenges faced this past year. We shared many giggles and smiles burying our capsule!!!! We are excited to share some post-covid laughs about these in the near future!

CORE WORD FOCUS:

"WANT", "NOT", "SEE", "LIKE"

SCIENCE FOCUS THIS MONTH:

Students really enjoyed participating in force and reaction experiments this month!! They worked on experimenting with "push" and "pull" factors using magnets and soccer balls, just to name a few!

LITERACY FOCUS THIS MONTH:

Students focused on practicing comprehension, sequencing and sentence building strategies that they have developed throughout the year. They enjoyed a variety of science literary texts looking at our 5 senses. They also investigated letter recognition with 5 letters "H", "T", "K", "M" and "U" with Osmo and Marbotics!

NUMERACY FOCUS THIS MONTH:

Students worked on Number Sense and Numeration skills with counting and ordering #1-20 and comparing their values through "most" and "least" activities. We had so much fun with Colby, Code-a-pillar and Bee-bot! They were an enormous help in locating all kinds of fun items as we practiced our sorting skills!
